Creating healthy religious communities is the best form of prevention. Medicine, psychology, and studies in spirituality are pointing out the necessity of fostering healthy ways of relating. This day will explore these aspects that create health, well-being and engagement.

We will focus on the dynamics of fostering cultural change plus the dual and complementary relationship of safety and well-being. The presenters will use engaging case studies, dialogue and discussion as we move from high risk to High-Reliability Organizations (HRO).

Leadership teams and safety/health and wellness teams are encouraged to attend this dynamic one-day workshop, held in conjunction with the CMSM National Assembly, at the newly renovated Sheraton Westport Chalet Hotel in St. Louis, Missouri.
